

# C400 Course

## Performance Issue Report Analysis

---

**Student Name:** \_\_\_\_\_  
**Student ID:** \_\_\_\_\_  
**Time to Complete (minutes):** \_\_\_\_\_

### Assigned Project: Apache Groovy

#### Assigned Issue Tickets:

**GROOVY-323, GROOVY-3256, GROOVY-5428, GROOVY-7705, GROOVY-7873**

**Instructions:** Apache Groovy is a powerful, optionally typed and dynamic language for the Java platform aimed at improving developer productivity. It offers a concise, familiar, and easy-to-learn syntax. Your task is to analyze five performance-related issue tickets from this project to understand how performance problems are identified, discussed, and resolved in a real-world setting. You have been assigned five specific issue tickets to analyze. For each ticket, please complete the analysis form on the following pages. Your goal is to act as a software quality analyst, using the provided evidence within the ticket to understand the return on investment (ROI) and other factors involved in fixing a real-world performance bug.

## Issue Ticket Analysis: GROOVY-323

1. **Performance Problem Summary** *In 1-3 sentences, what is the core performance problem described in this issue ticket?*

---

---

2. **Profiling Data** *Quote the exact sentence(s) from the ticket's description or comments that contain performance-related data or observations.*

---

---

---

3. **Return (R)** *How much time (or %) was the performance improved? Extract or calculate this from the profiling data.*

---

---

4. **Investment (I)** *How many unique developers participated, and what is the total number of comments?*

• Unique Developers: \_\_\_\_\_ • Total Comments: \_\_\_\_\_

5. **Analysis of Other Quality Attributes** *Were other quality attributes (e.g., maintainability, readability) mentioned? If so, provide the quote as evidence.*

• Attribute(s) Mentioned: \_\_\_\_\_

• Evidence (Quote):

---

---

6. **ROI Assessment** *Based on your findings for Return (R) and Investment (I), would you classify the ROI for fixing this issue as high or low? Briefly explain why.*

---

---

7. **Task Feedback** *What was the biggest challenge you faced while analyzing this ticket? (e.g., difficulty finding data, unclear discussions, etc.)*

---

---

## Issue Ticket Analysis: GROOVY-3256

1. **Performance Problem Summary** *In 1-3 sentences, what is the core performance problem described in this issue ticket?*

---

---

2. **Profiling Data** *Quote the exact sentence(s) from the ticket's description or comments that contain performance-related data or observations.*

---

---

---

3. **Return (R)** *How much time (or %) was the performance improved? Extract or calculate this from the profiling data.*

---

---

4. **Investment (I)** *How many unique developers participated, and what is the total number of comments?*

• Unique Developers: \_\_\_\_\_ • Total Comments: \_\_\_\_\_

5. **Analysis of Other Quality Attributes** *Were other quality attributes (e.g., maintainability, readability) mentioned? If so, provide the quote as evidence.*

• Attribute(s) Mentioned: \_\_\_\_\_

• Evidence (Quote):

---

---

6. **ROI Assessment** *Based on your findings for Return (R) and Investment (I), would you classify the ROI for fixing this issue as high or low? Briefly explain why.*

---

---

7. **Task Feedback** *What was the biggest challenge you faced while analyzing this ticket? (e.g., difficulty finding data, unclear discussions, etc.)*

---

---

## Issue Ticket Analysis: GROOVY-5428

1. **Performance Problem Summary** *In 1-3 sentences, what is the core performance problem described in this issue ticket?*

---

---

2. **Profiling Data** *Quote the exact sentence(s) from the ticket's description or comments that contain performance-related data or observations.*

---

---

---

3. **Return (R)** *How much time (or %) was the performance improved? Extract or calculate this from the profiling data.*

---

---

4. **Investment (I)** *How many unique developers participated, and what is the total number of comments?*

• Unique Developers: \_\_\_\_\_ • Total Comments: \_\_\_\_\_

5. **Analysis of Other Quality Attributes** *Were other quality attributes (e.g., maintainability, readability) mentioned? If so, provide the quote as evidence.*

• Attribute(s) Mentioned: \_\_\_\_\_

• Evidence (Quote):

---

---

6. **ROI Assessment** *Based on your findings for Return (R) and Investment (I), would you classify the ROI for fixing this issue as high or low? Briefly explain why.*

---

---

7. **Task Feedback** *What was the biggest challenge you faced while analyzing this ticket? (e.g., difficulty finding data, unclear discussions, etc.)*

---

---

## Issue Ticket Analysis: GROOVY-7705

1. **Performance Problem Summary** *In 1-3 sentences, what is the core performance problem described in this issue ticket?*

---

---

2. **Profiling Data** *Quote the exact sentence(s) from the ticket's description or comments that contain performance-related data or observations.*

---

---

---

3. **Return (R)** *How much time (or %) was the performance improved? Extract or calculate this from the profiling data.*

---

---

4. **Investment (I)** *How many unique developers participated, and what is the total number of comments?*

• Unique Developers: \_\_\_\_\_ • Total Comments: \_\_\_\_\_

5. **Analysis of Other Quality Attributes** *Were other quality attributes (e.g., maintainability, readability) mentioned? If so, provide the quote as evidence.*

• Attribute(s) Mentioned: \_\_\_\_\_

• Evidence (Quote):

---

---

6. **ROI Assessment** *Based on your findings for Return (R) and Investment (I), would you classify the ROI for fixing this issue as high or low? Briefly explain why.*

---

---

7. **Task Feedback** *What was the biggest challenge you faced while analyzing this ticket? (e.g., difficulty finding data, unclear discussions, etc.)*

---

---

## Issue Ticket Analysis: GROOVY-7873

1. **Performance Problem Summary** *In 1-3 sentences, what is the core performance problem described in this issue ticket?*

---

---

2. **Profiling Data** *Quote the exact sentence(s) from the ticket's description or comments that contain performance-related data or observations.*

---

---

---

3. **Return (R)** *How much time (or %) was the performance improved? Extract or calculate this from the profiling data.*

---

---

4. **Investment (I)** *How many unique developers participated, and what is the total number of comments?*

• Unique Developers: \_\_\_\_\_ • Total Comments: \_\_\_\_\_

5. **Analysis of Other Quality Attributes** *Were other quality attributes (e.g., maintainability, readability) mentioned? If so, provide the quote as evidence.*

• Attribute(s) Mentioned: \_\_\_\_\_

• Evidence (Quote):

---

---

6. **ROI Assessment** *Based on your findings for Return (R) and Investment (I), would you classify the ROI for fixing this issue as high or low? Briefly explain why.*

---

---

7. **Task Feedback** *What was the biggest challenge you faced while analyzing this ticket? (e.g., difficulty finding data, unclear discussions, etc.)*
